Setting Up Animation End Function

Demo

Review Animate.CSS documentation

Add on code to detect completion

Firing Code After Animation Completes

Listen for Animation to End

```
$('.section1').one(animationEnd, removeAni1);
```

Demo

Set up event listener

Create completion function

Remove class when animation completes

Sequencing Animations

Sequencing

Demo

Sequence animations

Use addClass to add more animations

Adding Animation End Functions to Our Demo Project

Demo

Remove toggle class

Update documentation code

Sequence animations

Summary

Setting up animation end functions

Fire code after animation completes

Sequence animations

Using documentation code to sequence
